

EV Supply Equipment (EVSE)

Support a low-carbon lifestyle with Transcend's PLP solutions

Transcend's Power Loss Protection (PLP) and Dynamic Thermal Throttling technologies are designed to ensure stable and reliable operations for electric vehicle supply equipment (EVSE), enabling effective signal/command transfer and high tolerance in case of sudden power loss or overheating issues. Equip your EVSE solutions with the reliability of Transcend's innovative PLP SSDs.

Zero Downtime

Power Loss Protection (PLP) & Dynamic Thermal Throttling ensure improved data integrity.

Optimal Performance

Built-in DRAM cache enhances transfer speed & drive endurance.

Value-added Technologies

Extra-thick 30 μ " PCB gold fingers & corner bond technology for stable data transmission.

Featured Products

PCIe M.2 2280
